

Storm Checklist - Before & After

Tropical storms and hurricanes can wreak havoc on your property.
Protect your business and your home with this checklist!

□ Before the Storm (if possible):

- Take updated **photos/videos** of your property (interior and exterior)
- Store **important documents** in a waterproof container or cloud storage
- Review your **insurance policy** and note your coverage limits
- Save your insurance provider's **contact information** for easy access
- **Secure** your property by bringing in outdoor furniture, etc.
- **Back up** vital business data

□ Immediately After the Storm:

- Ensure your **safety** — only return to the property once it's safe
- Follow our [**Essentials After Property Damage**](#) steps & prevent further damage on your property
- Take wide angle and close-up **photos/videos of ALL damage** (roof, walls, floors, belongings)
- Don't throw away damaged items before **documenting** them
- Keep a **written list** of all damaged property and areas affected
- Save **receipts** for any emergency repairs or accommodations

□ Filing Your Claim:

- Contact your **insurance company** to notify them of the loss within your state's deadline.
- Write down your **claim number** and the name of your **adjuster**
- **Do not sign off** on any settlement right away — initial offers are often low
- Call **Building Damage Consultants** for a **claim review** (833-612-5246)

□ Work with a Public Adjuster:

- Let us inspect the damage and handle the **documentation**
- We'll review your policy, scope the loss, and work on **your** behalf
- You stay informed — **we handle the stress**

□ Don't forget:

- Detailed **documentation** = a stronger claim for you or your business
- You have the right to **full compensation** based on your policy
